MOBILE ENTERPRISE

Powered by Inform

A mobile lifeline in the field

WHAT IS THE PROBLEM?

Information is critical in the field. It's hard to make informed decisions when you're going in blind. Without real-time data or solutions that go beyond your vehicle, you just don't know what situation you're walking or running into. Extending a responder's connection to command staff and information from the vehicle to the street is critical to responder and citizen safety. Plus, citizens want to see your responders on the streets, not back at the office filing reports or uploading digital evidence to a server.

WHAT IS THE SOLUTION?

CentralSquare Mobile Enterprise keeps everyone in the know with tight integration to CAD and RMS. Responders get bi-directional, real-time connection to dispatch and command staff and partnering agencies. Everyone is safer and able to respond efficiently with historical information, alerts and intelligent mapping. Configure your system and workflow for painless field reporting with access to multiple databases based on your unit and personnel needs. Spend more time in the field, and less in the office.

SITUATIONAL AWARENESS	PAINLESS REPORTING	INTELLIGENT ROUTING	COMMUNITY FOCUSED PATROL	SECURE CONNECTION
Get BOLOS, call details, caution notes and track the position of units in the field	Easier field report submission with text-to-speech and voice recognition capabilities	Routable mapping and vehicle tracking for situational awareness and turn-by-turn navigation	Analytics for proactively placing units and staff at the right place at the right time	Mobile apps use the AWS Government cloud for an efficient, secure connection

CUSTOMER GAINS

COMMUNITY CONNECTION

Responders spend more time in the community and less behind a desk

RESPONDER LIFELINE

Real-time information during incidents to keep everyone safe and informed

FULL INTEGRATION

Extend CAD and Records information to your vehicles and beyond

CONNECT YOUR SMARTPHONE AND OTHER DEVICES WITH FIELD OPS

The CentralSquare Field Ops mobile application provides responders easy access to calls for service and location data, and the ability to upload digital evidence to a case file from their smartphone or tablet. GPS technology in the phone delivers a location back to CAD, so everyone's in the know on responder location. Command staff can easily see what's going on without having to log into a computer.

WHO WE ARE

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 7,500 organizations from the largest metropolitan city to counties and towns of every size across North America. Its technology platform provides solutions for public safety, including 911, computer aided dispatch, records management, mobile, and jail.

For public administration agencies, CentralSquare provides software for finance, community development, human capital management, utility billing, citizen engagement, asset management, property tax and municipal services. It also provides healthcare management software for hospitals and clinicians. CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. More information is available at **www.centralsquare.com**.
