

RECORDS ENTERPRISE

Powered by **Inform**

Access all your data
anywhere, anytime

WHAT IS THE PROBLEM?

Your information needs are complex. You collect so much data in so many places, but your records system hasn't evolved to meet your needs. So many different people need access to different types of data so they can make informed decisions. You spend way too much time entering data and pulling information back out of your software. As your agency grows and state and federal compliance standards change, you don't have the time or budget to update servers or keep coming back to your software vendor to adapt your software once again.

WHAT IS THE SOLUTION?

CentralSquare Records Enterprise has no limits. Enter your information once and you can share it across 911, CAD, Mobile and Jail. Customize your system for your agency and each user with personalized data-entry screens and layouts, including custom fields, drop-downs, labels, field placement, values, validations, workflows, report outputs and more. The only full-featured web-based, Next Generation ready RMS on the market, you can access it from an internet browser wherever you are.

REDUCED IT FOOTPRINT

As a web-based solution, there's no need to worry about upgrades or server maintenance

INSTANT ALERTS, ACCESS

Get critical alerts and access to relevant data in the field and office for responder safety

ENTER JUST ONCE

Data is entered only once and shared with more accuracy across 911, CAD, Mobile and Jail

FUTUREPROOF YOUR SYSTEM

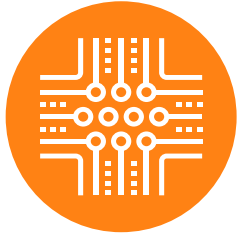

Adapt your system with the do-it-yourself module builder to meet your reporting and data needs today and in the future

SINGLE OR MULTI-AGENCY

Customize for the needs of a single agency or multiple agencies sharing the same system

CUT YOUR REPORTING TIME IN HALF

Officers can submit reports from the field without having to be behind closed doors in an office. Orange County Sheriff's Department, CA spent 60% less time writing reports and Dallas Ft. Worth Airport, TX spent 50% less time writing reports after implementing Records Enterprise. Thousands of agencies across the nation have also dramatically cut the time they spend submitting NIBRS and UCR data with the system's integration with federal, state, and court systems.

UPDATED TECHNOLOGY

Let your IT team focus on other priorities, knowing that every vehicle and workstation is up to date

BETTER COMPLIANCE

Spend less time and submit better NIBRS and UCR data with full submission integration

CUSTOMIZED EXPERIENCE

Get the system you need, with the functionality and flexibility customized to each agency and user

WHO WE ARE

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 7,500 organizations from the largest metropolitan city to counties and towns of every size across North America. Its technology platform provides solutions for public safety, including 911, computer aided dispatch, records management, mobile, and jail.

For public administration agencies, CentralSquare provides software for finance, community development, human capital management, utility billing, citizen engagement, asset management, property tax and municipal services. It also provides healthcare management software for hospitals and clinicians. CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. More information is available at www.centrialsquare.com.
