

# ClinicalLink

Unify your patient information to get the whole story, faster

## WHAT IS THE PROBLEM?

Many hospitals, especially those operating within smaller healthcare networks, struggle to get patient information from data-storage systems that are too numerous and complex to navigate. These disparate systems often are hard to use and may feature databases that do not communicate with each other, making data retrieval a slow and frustrating endeavor.

## WHAT IS THE SOLUTION?

CentralSquare ClinicalLink is a comprehensive, web-based solution that gives healthcare providers timely access to vital patient information in one common solution. Its unified, longitudinal view of vital patient data enables faster, more informed diagnosis and treatment decisions, while keeping care team members across health systems fully connected and up to date.

### **UNIFIED PATIENT VIEW**

Improves bedside decision making and reduces data entry, leading to fewer diagnostic tests and quicker consultations for patients

### **RAPID DATA ACCESS**

Connects care team members across the health system and allows instant retrieval of patient data

### **MOBILE ACCESS**

Delivers secure patient summaries and key data to mobile devices, whether in the hospital or elsewhere

### **DATA PROTECTION**

Protects patient privacy and ensures data security by giving clinicians appropriate and necessary information

# HOW DOES IT WORK?

ClinicalLink securely gathers vital patient information housed in disparate systems and brings it all into one comprehensive, configurable and mobile-friendly view. Its clinician-facing portal provides secure access to a comprehensive view of a patient's medical history in real time, enabling clinicians to make better decisions and improve care for their patients.

## CUSTOMER GAINS

### AGILITY

Supports a full array of clinical data types and sources for smarter integration

### SECURITY

Includes a multidimensional permissions module and stores all data locally

### PRIVACY

Supports granular permissions that can be applied to the user role or patient record

### MOBILITY

Easily and automatically supports mobile devices out of the box

## WHO WE ARE

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 7,500 organizations from the largest metropolitan city to counties and towns of every size across North America. Its technology platform provides solutions for public safety, including 911, computer aided dispatch, records management, mobile and jail.

For public administration agencies, CentralSquare provides software for finance, community development, human capital management, utility billing, citizen engagement, asset management, property tax and municipal services. It also provides healthcare management software for hospitals and clinicians. CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. More information is available at [www.centrialsquare.com](http://www.centrialsquare.com).

**7,500**  
AGENCY CUSTOMERS
