

CentralSquare Citigraf

(powered by Genetec™)

Creating a common
operating picture

WHAT IS THE PROBLEM?

When an emergency happens, decisions need to be made quickly. Many communications centers are hindered by siloed systems presenting large amounts of data. Time is wasted as agencies try to correlate this data into useful, actionable intel which means responders may not know the full extent of the event they are responding to.

WHAT IS THE SOLUTION?

Get real-time, connected visibility of incidents from multiple sources including CAD, RMS, public/private cameras, ShotSpotter, AVL, map information and sensors. Whether it's receiving an emergency call, responding to incidents, or ensuring public safety at an event, Citigraf provides a common operating picture so personnel can manage every type of situation – from the unexpected to the everyday.

WHAT ARE THE BENEFITS?

CentralSquare Citigraf, powered by Genetec, marks a critical shift away from siloed digital data sources towards a smarter future that unifies critical, lifesaving data into a single pane of glass. This new partnership between CentralSquare and Genetec combines the intelligence of the CentralSquare CAD and RMS with Genetec's Citigraf decision support system to empower public safety departments to build a deeper, data-driven understanding of what's happening in their city.

**SAVE LIVES BY USING
REAL-TIME RELEVANT
DATA TO BETTER EQUIP
YOUR TEAM**

SMARTER DECISION- MAKING

Leverage your CentralSquare CAD location information with existing live camera feeds to deliver real-time video surveillance and Records data to responders at the scene AND consolidate all the information in one place after the event to simplify case management.

IMPROVE SITUATIONAL AWARENESS

Provide responders with real-time information from multiple sources in a single view to have better insight into multi-facet events, and a better response with fewer regrets.

IMPROVE VICTIM SAFETY

In scenarios where a 911 caller cannot communicate what type of help they may need, using real-time data can help public safety agencies determine whether EMS, Fire and/or Law needs to respond to a 911 call.

WHO WE ARE

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 7,650 organizations from the largest metropolitan city to counties and towns of every size across North America.

CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. Our technology platform provides solutions for public safety, including 911, computer aided dispatch and records management. For public administration agencies, CentralSquare provides software for finance, human capital management, payroll, utility billing, asset management and community development.
