

CentralSquare DEMS

(powered by Genetec Clearance™)

Easily Collect and
Securely Share

WHAT IS THE PROBLEM?

When you couple an ever increasing amount of digital evidence with a smartphone-savvy public, the amount of incident-based video evidence grows. These new video sources, along with recordings from traditional surveillance systems, body-cams and in-car dash cams complicate the existing challenges of capturing and storing video footage, and the arduous compliance requirements for evidence sharing, FOIA and media requests. The result is massive volumes of digital evidence that must be managed effectively and shared securely.

WHAT ARE THE BENEFITS?

CentralSquare's Enterprise Suite and Pro Suite (CAD, RMS, Mobile and smartphone/tablet app) seamlessly integrate with Genetec's industry-leading products, enabling Public Safety agencies to incorporate the vast network of existing public and private video camera into their dispatch centers as well as share within the mobile environment of first responders and law enforcement.

WHAT IS THE SOLUTION?

CentralSquare DEMS, powered by Genetec, helps manage all sources of digital evidence – from city-owned and third-party cameras, to cell phone footage uploaded by citizens and even body-worn and dashboard camera systems. Collaborate easier and close cases faster with seamless data sharing between your DEMS and RMS systems, saving your team valuable time, instead of sifting through hours of video footage or managing multiple sources of digital evidence.

COLLECT

Bring together all your digital evidence: Gather video and sensor data from disparate sources, including body-worn cameras, in-car systems, public and private camera networks. File requests can be sent to specific individuals or published on social media to quickly gather large quantities of digital evidence from personal devices and security systems.

AUTOMATE

Save time on labor-intensive tasks: Locate your media quickly based on automatic associations between files and cases, eliminating manual searches through volumes of digital evidence. Convert and play videos automatically, quickly redact sensitive information and track user activity through audit trails.

MANAGE

Synchronize digital evidence automatically with CAD and RMS: Digital evidence is automatically synchronized with CentralSquare's CAD and Records to manage cases more efficiently. Use less time and labor juggling multiple applications – and classify evidence to make locating files easier.

COLLABORATE

Share evidence safely, at the click of a button: Collaborate with an unlimited number of users inside or outside your organization. Ensure privacy through redaction with time-saving tools such as face detection analytics.

WHO WE ARE

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 7,650 organizations from the largest metropolitan city to counties and towns of every size across North America.

CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. Our technology platform provides solutions for public safety, including 911, computer aided dispatch and records management. For public administration agencies, CentralSquare provides software for finance, human capital management, payroll, utility billing, asset management and community development.
